Meerut, Uttar Pradesh

PROFESSIONAL SUMMARY

BCA student and aspiring Software Developer with hands-on experience building Java desktop applications and Python-based AI applications. Strong foundation in Java, Object-Oriented Programming, Collections, SQL, Git/GitHub, and problem solving, with additional exposure to web technologies and Generative AI. Built projects involving authentication, data persistence, OCR, transaction tracking, portfolio management, and financial dashboards. Seeking an entry-level software engineering opportunity to contribute to reliable software development while continuing to strengthen Data Structures and Algorithms and backend engineering skills.

TECHNICAL SKILLS

Programming: Java, Python, C++, JavaScript

Core CS: Object-Oriented Programming, Data Structures & Algorithms, Problem Solving, DBMS, SQL

Development: CustomTkinter, Java Swing, HTML, CSS, JavaScript, SQLite, MySQL

AI & Data: Gemini API, Generative AI, Tesseract OCR, PyMuPDF, pytesseract

Tools: Git, GitHub, Visual Studio Code

PROJECTS

Nexora AI — AI Assistant | *Python, CustomTkinter, Gemini API, SQLite, Tesseract OCR, PyMuPDF*

- Developed a desktop AI assistant with a modern GUI, user authentication, chat interface, chat history, and persistent memory.
- Integrated Gemini AI for conversational responses and added TXT/PDF processing with text extraction and OCR support for scanned PDFs.
- Implemented SQLite-based data persistence for user accounts, conversations, and application data, with voice input/output support.

ExpenseWise — Personal Expense Manager | *Java, Swing, OOP, Collections, File Handling*

- Built a desktop expense management application to record, edit, remove, filter, and summarize personal expenses by category and date.
- Applied OOP principles, encapsulation, collections, and modular class design to manage expense records and calculations.
- Added dashboard-oriented spending views and export-oriented functionality to make financial records easier to analyze and maintain.

Stock Tracker / Stock Trading Platform | *Java, OOP, Collections*

- Developed a stock tracking and trading application to simulate buy/sell operations and maintain user holdings.
- Implemented market data display, portfolio tracking, and transaction history with quantity, price, date/time, and total transaction amount.
- Used Java Collections such as List and Map with encapsulation and modular design for portfolio and transaction management.

EDUCATION

Bachelor of Computer Applications (BCA) — Meerut Institute of Technology, Meerut

August 2024 – Present | 74% up to 2nd semester

Intermediate Education — Gaya College, Gaya

2019 – 2021 | Bihar School Examination Board | 71.6%

Matriculation — +2 Ashok High School, Paraiya (Gaya)

2018 – 2019 | Bihar School Examination Board | 74%

CERTIFICATIONS & ACHIEVEMENT

- IBM Web Development Fundamentals
- Introduction to Generative AI on Google Cloud
- Cisco Introduction to Cybersecurity
- 2nd Place – Idea Pitching Competition, Tech Fest 2025 — EYETIQ (AI-Based Attendance System)
